

William BUHLMAN the Out of Body Experience

The benefits of out-of-body exploration extend far beyond the limits of our physical senses and our intellect. After an out-of-body experience, many people report an inner awakening of their spiritual identity, a transformation of their self-concept. They see themselves as more than matter - more aware and alive.

They express a profound inner wisdom based on personal spiritual experience. Many report being connected to something greater than themselves, connected to the very source of life itself. They report a powerful feeling of breaking through a dense barrier of ignorance, fear and limitation. During my workshops, I often hear reports of an increase in personal knowledge and an inner connection to spirit. Many report a dramatic expansion of their perception capabilities extending far beyond their physical limits - an overwhelming sense of knowing based on direct personal experience.
